14. Complete Feature Overview48

In Microsoft Word, right-click the table above and choose "Update Field" to fill in the page numbers.

1. Welcome to CampusConnect

Welcome to CampusConnect — a modern campus management platform that brings a college's daily operations together in one place. Attendance, timetables, exams, study materials, announcements, calendars, and communication are all managed through a single, easy-to-use web application.

This manual is a complete visual guide to the platform. It walks through every screen an Administrator, a Teacher, and a Student sees after logging in, explains what each screen does, and shows the exact steps for the most common tasks. Every screenshot in this document is taken directly from the live CampusConnect application.

How to use this manual:

- If you are evaluating CampusConnect, read Chapters 2–5 for an overview, then browse the role guides (Chapters 6–8) to see the product in action.
- If you are an administrator, teacher, or student, jump straight to your role's chapter — each one is a self-contained walkthrough of your workspace.
- Chapter 10 collects the most common step-by-step workflows in one place for quick reference.

2. About CampusConnect

CampusConnect replaces scattered spreadsheets, notice boards, and messaging groups with one connected platform. Every user signs in with a personal account and sees a workspace built specifically for their role.

Figure 2.1 — About CampusConnect

The About page introduces the platform's mission, values, and the team behind it. It is publicly accessible from the website header.

The three roles

Role	Who it is for	What they use it for
Administrator	College management and office staff	Manage students, teachers, subjects, exams, announcements, calendars, and bulk operations
Teacher	Faculty members	Run attendance sessions, manage timetables, view assigned students, share study material, post announcements
Student	Enrolled students	Mark attendance, view timetables and exams, download study resources, read announcements, join discussions

Highlights at a glance:

- Smart attendance — live attendance sessions with secure fingerprint (passkey), face recognition, and a QR-code backup method.
- Central academics — branch-wise subject sets, shared class timetables, and year-wise exam schedules.
- Campus communication — announcements with urgency levels, events and academic calendars, direct messages, and student discussions.
- Bulk operations — onboard an entire admission list and update academic years in one step.
- Role-based security — every user sees only the screens and actions that belong to their role.

3. Getting Started

CampusConnect is a web application — there is nothing to install. It works on any modern browser (Chrome, Edge, Firefox, Safari) on desktops, laptops, and mobile devices.

Figure 3.1 — CampusConnect Home Page

The public home page is the front door of the platform. From here, visitors can learn about the product and existing users can sign in.

Visible elements:

1. Header navigation — Home, About, and Login links.
2. Get Started — takes you to the login area.
3. Explore Platform — scrolls through the platform overview.
4. Feature highlights — role flows, attendance methods, and communication capabilities.

NOTE: Your institution shares the website address and your login details with you. Students and teachers receive their login credentials by email when their account is created.

4. Signing In

Every user signs in through a role-specific login page. Choose your role first, then enter your credentials.

Figure 4.1 — Choose Your Role

The login chooser presents the three roles. Selecting a card opens the matching sign-in form.

Visible elements:

- 1. Student — sign in with your student email and password.
- 2. Teacher — sign in with your Teacher ID (or login email) and password.
- 3. Admin — sign in with your administrator email and password.

Figure 4.2 — Admin Sign-in

Administrators sign in with their admin email address and password.

Figure 4.3 — Teacher Sign-in

Teachers can sign in with just their Teacher ID (for example, PM01) — the platform finds the matching account automatically. The full login email also works.

Figure 4.4 — Student Sign-in

Students sign in with their student email address and password.

Forgot your password?

Every sign-in page has a "Forgot password?" option. Enter your registered email address and the platform sends a one-time verification code. After entering the code, you set a new password and can sign in immediately.

TIP: After signing in, you land on your role's dashboard automatically. The platform recognises your role — there is no extra step.

5. Understanding the Interface

All three workspaces share the same clean layout, so anything you learn in one role carries over to the others.

Figure 5.1 — The CampusConnect Workspace Layout (Admin example)

Every page follows this structure:

Visible elements:

1. Sidebar (left) — grouped navigation for your role. The active page is highlighted.
2. Header (top) — the current page name, a notification bell with an unread count, and your profile chip.
3. Profile chip — shows your name; it opens account options, and the workspace label under the page title confirms the role you are signed in as.
4. Main area — the content of the current page: cards, tables, forms, and charts.
5. Quick-access pills — dashboards offer one-click shortcuts to the most used areas.
6. Collapse — the sidebar can be collapsed to give the content more space.

TIP: The bell icon in the header shows how many unread notifications you have. Announcements marked urgent stand out so nobody misses them.

6. Administrator — Complete Visual Guide

The administrator workspace is the control centre of CampusConnect. This chapter walks through every screen in the admin sidebar, in order.

6.1 Admin Dashboard

Access: sign in as Admin → Dashboard.

Figure 6.1 — Admin Dashboard

The dashboard summarises the whole campus at a glance and offers shortcuts into every admin tool.

Visible elements:

1. Total Students — live student count with a per-department breakdown.
2. Total Teachers — faculty count by department.
3. Announcements — number of published announcements.
4. Exam Entries — exam timetable entries currently saved.
5. Quick Control — one-click shortcuts to Manage Students, Manage Teachers, Announcements, Subject Sets, Bulk Update, and Settings.
6. Quick-access pills — jump straight to any admin area, including FixIt and Calendars.

6.2 Student Management

Access: Admin → Students. What you can do here: search students, browse them by department, add a new student, edit or delete an existing one, and jump to bulk academic updates.

Figure 6.2 — Student Management

Students are organised into one card per department, each showing its student count.

Visible elements:

- 1. Search — find a student by name, email, or roll number.
- 2. Refresh — reload the latest student list.
- 3. Add User — opens the Add Student form.
- 4. Bulk Academic Update — shortcut to the bulk year/semester update tool.
- 5. Department cards — each card lists that department's students with a student count badge.

Figure 6.3 — Student Records by Department

Scrolling down shows each department's table: student name, email, roll number, and per-student Edit and Delete actions.

Figure 6.4 — Searching for a Student

Typing in the search box filters every department instantly. Here, searching "Aarav" narrows the list to the matching student.

Figure 6.5 — Add Student Form

Add User opens this form. Fill in the student's name, email, roll number, department, year, and semester, then select Add User.

Visible elements:

1. Name, Email, Roll Number — the student's identity details.
2. Role — fixed to Student for this form.
3. Department, Year, Semester — the student's academic placement.
4. Add User / Cancel — save the record or close without saving.

NOTE: When a student is added, the platform creates their account and emails the login credentials to the student automatically — the administrator never has to handle passwords.

What happens after: the student appears in their department card immediately and can sign in with the emailed credentials. Editing works the same way — select Edit next to a student to open the same form pre-filled.

6.3 Teacher Management

Access: Admin → Teachers. What you can do here: search faculty, add a teacher with subject assignments, edit teacher details, and remove a teacher.

Figure 6.6 — Teacher Management

Teacher Management
Manage faculty records and their teaching assignments.

Search teacher by name, email or ID

Refresh Add Teacher

← Back to Dashboard

All Teachers 7 total

NAME	MOBILE	EMAIL	DEPARTMENT	TEACHER ID	JOB PROFILE	ACTIONS
Prof. Kavita Joshi	9800000007	kavita.joshi@campusconnect.demo	Civil Engineering	VT01	Visiting Faculty	Edit Delete
Demo Teacher One	9000000001	pm01@campusconnect.teacher	Computer Engineering	PM01	Permanent Faculty	Edit Delete
Demo Teacher Three	9000000003	pm03@campusconnect.teacher	Computer Engineering	PM03	Permanent Faculty	Edit Delete
Demo Teacher Two	9000000002	pm02@campusconnect.teacher	Computer Engineering	PM02	Permanent Faculty	Edit Delete
Dr. Anil Kher	9800000004	anil.kher@campusconnect.demo	Computer Engineering	PM04	Permanent Faculty	Edit Delete
Prof. Sunita Rao	9800000005	sunita.rao@campusconnect.demo	Electrical Engineering	PM05	Permanent Faculty	Edit Delete
Dr. Ramesh Iyer	9800000006	ramesh.iyer@campusconnect.demo	Mechanical Engineering	AD01	Adjunct Faculty	Edit Delete

Every teacher is listed with their ID, job profile, department, and assigned subjects.

Visible elements:

1. Search — find a teacher by name, email, or ID.
2. Add Teacher — opens the Add Teacher form.
3. Teacher list — each row shows the teacher's details with Edit and Delete actions.

Figure 6.7 — Add Teacher Form

The screenshot displays the 'Teacher Management' section of the CampusConnect application. A modal window titled 'Add Teacher' is open, prompting the user to 'Fill in the details and assign teaching load.' The form contains the following fields:

- Name:** A text input field.
- Email:** A text input field.
- Mobile Number:** A text input field.
- Job Profile:** A dropdown menu with the option 'Select Job Profile'.
- Department:** A dropdown menu with the option 'Select Department'.
- Teacher ID:** A text input field with the placeholder 'Auto-generated after save'.

At the bottom of the modal, there are 'Cancel' and 'Add Teacher' buttons. The background shows the 'Teacher Management' dashboard with a search bar, a 'Refresh' button, and a table of existing teachers.

The Add Teacher form captures the teacher's details and their teaching assignments.

Visible elements:

1. Name, Email, Mobile Number — contact details.
2. Job Profile — Permanent, Adjunct, or Visiting Faculty.
3. Department — the teacher's home department.
4. Teacher ID — generated automatically by the platform.
5. Assignments — pick a branch and year, tick the subjects the teacher will teach, and select Add Assignment.

What happens after: the platform generates the Teacher ID, creates the account, emails the login details to the teacher, and links the teacher to every student who studies the assigned subjects.

6.4 Subject Sets

Access: Admin → Subject Sets. What you can do here: define the official subject list for every branch, year, and semester — the single source used across student onboarding, teacher assignment, timetables, and study materials.

Figure 6.8 — Subject Set Management

Subject Set Management

Manage centralized subjects for each branch and year. These sets are used for both student onboarding and teacher course assignment consistency.

Edit Subject Set
Pick a branch, year, and semester, then edit the subjects (one per line) and save.

Branch: Computer Engineering Year: 1st Year Semester: Semester 1 Refreshing... Save Set

Subjects for Computer Engineering - 1st Year - Semester 1 (one per line)

Introduction to Programming
Mathematics I
Physics

Current Subject Matrix

BRANCH	1ST - SEM 1	1ST - SEM 2	2ND - SEM 1
Computer Engineering	Introduction to Programming, Mathematics I, Physics	Chemistry, Environmental Studies	Data Structures, Algorithms, Computer Net
Electronics And TeleCommunication Engineering	Basic Electronics, Mathematics I, Physics	Chemistry, Environmental Studies	Signals and Systems, Digital Electronics, Ci
Mechanical Engineering	Engineering Mechanics, Mathematics I, Physics	Chemistry, Environmental Studies	Thermodynamics, Fluid Mechanics, Manufi

Pick a branch, year, and semester, edit the subjects (one per line), and save.

Visible elements:

1. Branch / Year / Semester — choose which subject set to edit.
2. Subjects editor — the subject list, one subject per line.
3. Save Set — publish the updated list.
4. Current Subject Matrix — a live overview of every branch's subjects across years and semesters.

6.5 Exam Timetable

Access: Admin → Exam Timetable. What you can do here: build each academic year's exam schedule three ways — import from a scanned timetable, type entries manually, or upload the official PDF — then review everything in one table.

Figure 6.9 — Exam Timetable — OCR Upload

Page 17 of 48

Manual Entry lets you add exams row by row — day, date, time, course code, duration, and course name — and edit any previously extracted rows before saving.

Figure 6.11 — Exam Timetable — View Exams

View Exams shows every saved entry for the selected year in one table, with inline editing and per-row delete.

What happens after: saved exams appear on every relevant student's and teacher's Exam Timetable page, and exam reminders are sent automatically as the date approaches.

6.6 Student Onboarding (Bulk)

Access: Admin → Student Onboarding. What you can do here: create an entire intake of student accounts from one admission-list file instead of typing them one by one.

Figure 6.12 — Bulk Student Onboarding

Upload the admission list, choose how to treat students that already exist, pre-check the data, then create all accounts in one step.

Visible elements:

1. Admission List File — upload a CSV, PDF, or image of the admission list.
2. Existing PRN Strategy — choose what happens when a listed student already has an account.
3. Pre-check — validate the file and preview what will be created before committing.
4. Parse File — read the uploaded file into editable rows.
5. Create Accounts — create every account and email each student their credentials.

6.7 Academic Update (Bulk)

Access: Admin → Academic Update. What you can do here: move whole groups of students to their next year or semester in one operation — for example, promoting all of 2nd Year to 3rd Year at the start of a new session — with a preview before anything is changed.

Figure 6.13 — Bulk Academic Update

Bulk Academic Update

Update existing students in bulk by selecting records from the list. Apply branch, year, and semester in one action instead of editing each student individually.

Loaded 33 student records.

Select & Apply
Filter the roster, choose the new academic values, then apply them to the selected students.

☐	DEMO2603	Demo Student Three	demo2603@campusconnect.student	Computer Engineering	2nd	1

Select the students by department and year, choose the new year/semester, preview the change, and apply it to everyone at once.

6.8 Announcements

Access: Admin → Announcements. What you can do here: publish campus-wide announcements, mark them urgent or as events, see how many students have read each one, and edit, hide, or delete any announcement.

Figure 6.14 — Announcement Management

All announcements in one place, with live statistics.

Visible elements:

1. Statistics — Total, Active, Events, and Urgent announcement counts.
2. Search and Filter — find announcements by text or show only one type.
3. New Announcement — open the publishing form.
4. Announcement cards — each shows its type badge, message, posting time, and view count.
5. Hide / Edit / Delete — per-announcement controls.

Figure 6.15 — New Announcement

Publishing takes three inputs: a title, the message, and a type — General, Urgent, or Event. The announcement is visible to students and teachers the moment it is posted, and urgent ones are highlighted.

6.9 Calendars

Access: Admin → Calendars. What you can do here: maintain the two campus calendars everyone sees.

Figure 6.16 — Calendars Hub

Two calendars serve different purposes, with clearly stated edit rights.

Visible elements:

1. Events Calendar — workshops, seminars, and activities; teachers and admins can add events.
2. Academic Calendar — the official academic schedule; only admins can modify it.

Figure 6.17 — Events Calendar

A month view of campus events. Administrators and teachers can add events; everyone else sees them instantly.

Figure 6.18 — Academic Calendar

The official academic schedule — semester dates, examinations, holidays, and deadlines — maintained by administrators.

6.10 Settings

Access: Admin → Settings. What you can do here: review your administrator account and manage platform preferences, organised into tabs.

Figure 6.19 — Admin Settings

Settings are grouped into Profile Settings, Security, Notifications, and System Settings tabs. Profile Settings shows the signed-in administrator's name, email, and role.

6.11 Profile

Access: Admin → Profile. Your personal account page — the same page every role has. From here you can review your details, update your profile, and change your password.

Figure 6.20 — Admin Profile

The profile page shows your account information with options to edit the profile and manage your password.

6.12 Logging out

Select Logout (shown on the dashboard header) or open the profile chip menu and choose Logout. You are returned to the sign-in page immediately.

7. Teacher — Complete Visual Guide

The teacher workspace focuses on the daily teaching routine: attendance, the class timetable, students, courses, and study material.

7.1 Teacher Dashboard

Figure 7.1 — Teacher Dashboard

The dashboard greets the teacher with their department and today's teaching load.

Visible elements:

1. Today's Classes — lectures scheduled for today.
2. Weekly Classes — total lectures this week.
3. Active Announcements — campus announcements currently live.
4. Assigned Courses — subjects this teacher teaches.
5. Today's Classes panel — today's schedule (with a friendly empty state on free days).
6. Quick Actions — jump to Attendance, Student Chats, and Study Materials.

7.2 Smart Attendance

Access: Teacher → Smart Attendance. What you can do here: run live, verified attendance sessions and monitor attendance analytics for your subjects.

Figure 7.2 — Smart Attendance

The attendance hub shows the current session area and analytics for the teacher's subject.

Visible elements:

1. Mark Attendance — starts a new live session.
2. Active session area — shows the running session, or an empty state when none is live.
3. Classes Conducted / Attendance Rate / Students at Risk — headline analytics.
4. Weekly Attendance Trend and Present Students — charts of recent attendance.

Figure 7.3 — Start Attendance Session

Mark Attendance opens this form. Pick the date, choose the lecture from your timetable, and set how long the attendance window stays open.

Visible elements:

1. Date — the session date (must match the lecture's weekday).
2. Lecture — select from your scheduled timetable lectures.
3. Attendance Time Slot — how long students have to mark themselves present.
4. Location check — optionally require students to be physically nearby.

What happens after: the session goes live instantly. Students see it on their Attendance page and verify with fingerprint or face recognition; the teacher watches students appear live as they mark, can mark students manually by scanning their profile QR code, and ends the session at any time.

Figure 7.4 — Past Session Details

Every finished session keeps its full record. View Details shows who was present, how each student verified, and the session timing.

7.3 Attendance Tracker

Access: Teacher → Attendance Tracker. What you can do here: review attendance across all sessions and students — percentages per student, session history, and printable reports.

Figure 7.5 — Attendance Tracker

The tracker aggregates every session for the teacher's subjects, highlighting each student's attendance percentage and flagging students below the safe threshold.

7.4 Timetable

Access: Teacher → Timetable. What you can do here: view the shared weekly class timetable for any branch, year, and semester, and add your own lectures — with automatic protection against double-booking a slot.

Figure 7.6 — My Timetable

The weekly grid shows every scheduled lecture. The teacher's own lectures carry a "Your Lecture" badge.

Visible elements:

1. Branch / Year / Semester — choose which class group's timetable to view.

2. Weekly grid — time slots down the side, weekdays across the top.
3. Lecture cards — subject, teacher, time, and status badges.
4. Add lecture — schedule a new lecture in a free slot.

Figure 7.7 — Add Lecture

Adding a lecture takes the class group (pre-filled), the subject from the official subject set, the weekday, and the time slot. The platform blocks overlapping bookings automatically.

What happens after: the lecture appears on the shared timetable for every student in that class group, and it becomes selectable when starting an attendance session.

7.5 My Students

Access: Teacher → My Students. What you can do here: see exactly which students you teach, per assigned subject, and export the list.

Figure 7.8 — My Students

Collapse

Selecting an assignment card loads every matching student.

Visible elements:

1. Assignment cards — one per branch-year assignment with its subjects.
2. Search — filter the loaded students by name or PRN.
3. Students table — name, PRN, roll number, login email, contact details, department, and year.
4. Export Selected CSV / PDF — download the selected students as a spreadsheet or document.

7.6 Courses

Access: Teacher → Courses. A clear summary of every subject you are assigned to teach, organised by branch and year.

Figure 7.9 — Courses

The screenshot displays the 'Courses' interface for a teacher. On the left is a sidebar with a 'Collapse' button and navigation links: Overview, Attendance (Smart Attendance, Attendance Tracker), Academics (Timetable, My Students, **Courses**, Study Material, Exam Timetable), Campus (Announcements, Calendars), Communication (Messages), and Account (Profile). The main area is titled 'Your Courses' for the 'Department: Computer Engineering'. It features three cards: 'BRANCH-YEAR BLOCKS' (1), 'SUBJECT ASSIGNMENTS' (2), and 'DEPARTMENT' (Computer Engineering). Below these is the 'Assigned teaching loads' section, which lists 'Computer Engineering' (2nd Year) with subjects 'Data Structures' and 'Algorithms'. The 'Teaching resources' section provides links to 'Access learning materials in the Resources section', 'Schedule office hours using the Calendar', 'Communicate with students through the Chat feature', and 'Post announcements to keep your students updated'.

Each assigned course is shown with its branch, year, and subject details.

7.7 Study Material

Access: Teacher → Study Material. What you can do here: upload notes and resources for your subjects and manage what you have shared. Students in the matching class see the material instantly.

Figure 7.10 — Study Material

The screenshot shows the 'Study Material' interface. The sidebar is identical to the previous figure, with 'Study Material' highlighted in the Academics section. The main area is titled 'Study Materials' for the 'Department: Computer Engineering'. It contains a 'Browse materials' section with a prompt to 'Pick a branch and subject to view its uploaded materials.' Below this are two dropdown menus: 'Branch / Department' (set to 'Computer Engineering (Your Department)') and 'Subject' (set to 'Data Structures'). The 'Upload new material' section prompts the user to 'Share notes, assignments, references and more with your students.' It includes a 'Title' field, a 'Category' dropdown (set to 'Notes'), a 'Description' text area, and a 'File' section with a 'Choose File' button and 'No file chosen' text. A note specifies 'Max file size: 10MB. Supported formats: PDF, DOC, DOCX, PPT, PPTX, XLS, XLSX, TXT, JPG, PNG, ZIP, RAR'. An 'Upload Material' button is located below the file section. The 'Your Materials' section is partially visible at the bottom.

Upload a file, tag it with the branch, year, and subject it belongs to, and publish. Your uploaded materials are listed for review or removal.

7.8 Exam Timetable

Figure 7.11 — Exam Timetable (Teacher view)

Teachers see the same official exam schedule the administrators publish, filtered by academic year.

7.9 Announcements

Figure 7.12 — Announcements (Teacher view)

Teachers read campus announcements here, with urgent items highlighted.

7.10 Calendars

Figure 7.13 — Calendars (Teacher view)

Teachers can view both calendars and add events to the Events Calendar.

7.11 Messages

Access: Teacher → Messages. Direct, real-time chat between teachers and their students — questions answered without exchanging phone numbers.

Figure 7.14 — Messages

Conversations are listed on the left; the selected conversation opens on the right. Attachments are supported.

7.12 Profile

Figure 7.15 — Teacher Profile

The teacher's account page — personal details, profile photo, and password management.

8. Student — Complete Visual Guide

The student workspace puts everything a student needs day to day one click away: attendance, timetables, exams, study resources, announcements, and communication.

8.1 Student Dashboard

Figure 8.1 — Student Dashboard

The dashboard greets the student with their programme details and today's outlook.

Visible elements:

1. Programme line — department, year, semester, and division.
2. Classes Today / Weekly Classes — schedule at a glance.
3. Attendance — the student's current attendance percentage.
4. New Alerts — unread notifications.
5. Quick Actions — Mark Attendance, Full Timetable, Calendars, and Exam Timetable.
6. Today's Schedule — the day's lectures (with a friendly empty state on free days).

8.2 Attendance

Access: Student → Attendance. What you can do here: join a live attendance session started by your teacher and verify your presence securely.

Figure 8.2 — Student Attendance

The attendance page offers two verification methods and a backup QR code.

Visible elements:

1. Attendance Method — switch between Fingerprint and Face Recognition.
2. Active Attendance Sessions — live sessions appear here with a Join option; Refresh checks for new ones.
3. Profile QR Code — a personal QR the teacher can scan if your device's biometrics are unavailable.
4. Passkey Verification — register once, then verify each session with your device's fingerprint or biometric.

How it works: when a teacher starts a session for your class, it appears under Active Attendance Sessions. Join it, verify with your fingerprint or face, and your attendance is recorded instantly — each verification counts for that one session only, which keeps proxy attendance out.

8.3 My Timetable

Figure 8.3 — My Timetable

The student's weekly class schedule — every lecture for their branch, year, and semester in a single grid.

8.4 Exam Timetable

Figure 8.4 — Exam Timetable (Student view)

The official exam schedule for the student's academic year, exactly as published by the administration. Exam reminders arrive automatically as dates approach.

8.5 Study Resources

Figure 8.5 — Study Resources

Notes and materials shared by teachers, filterable by course, department, and subject, with keyword search. Each material can be viewed or downloaded; a clear message is shown when a course has no materials yet.

8.6 Announcements

Figure 8.6 — Announcements (Student view)

Campus announcements in one feed — urgent notices, events, and general updates. Reading an announcement marks it as read.

8.7 Calendars

Figure 8.7 — Calendars (Student view)

Students view the Events Calendar and the official Academic Calendar — semester dates, exams, and holidays — in read-only mode.

8.8 Discussions

Figure 8.8 — Discussions

A campus discussion space where students post questions and ideas and reply to classmates — moderated and organised by topic.

8.9 Messages

Figure 8.9 — Messages (Student view)

Direct chat with your teachers. Pick a teacher, ask your question, and get a reply in the same thread.

8.10 Profile

Figure 8.10 — Student Profile

The student's account page — personal and academic details, profile photo, and password management. The profile QR code used for backup attendance also lives here.

9. How the Three Roles Differ

The same platform, three tailored experiences. The side-by-side views below show how each role's dashboard and sidebar are built around that role's daily work.

Figure 9.1 — Admin Dashboard — campus control centre

Administrators see campus-wide counts and management shortcuts; their sidebar covers people, academics, bulk operations, campus content, and system settings.

Figure 9.2 — Teacher Dashboard — the teaching day

Teachers see their classes, courses, and attendance tools; their sidebar covers attendance, academics, campus content, and communication.

Figure 9.3 — Student Dashboard — the student day

Students see their schedule, attendance percentage, and alerts; their sidebar covers academics, campus content, and communication.

Area	Admin	Teacher	Student
Students & Teachers	Full management	Views own students	—
Subjects & Exams	Defines both	Views schedules	Views schedules
Attendance	—	Runs sessions, tracks	Marks & monitors own
Timetable	—	Views & adds lectures	Views own
Study Material	—	Uploads & manages	Views & downloads
Announcements	Publishes & manages	Reads	Reads
Calendars	Edits both	Adds events	Views
Messages & Discussions	—	Chats with students	Chats & discusses
Bulk operations & Settings	Yes	—	—

10. Common Workflows

The everyday tasks, condensed into steps. Each workflow references the figures shown earlier.

Workflow A — Add a new student (Admin)

1. Open Admin → Students (Figure 6.2).
2. Select Add User — the Add Student form opens (Figure 6.5).
3. Enter the student's name, email, and roll number; choose department, year, and semester.
4. Select Add User to save.
5. The student appears in their department card, and their login credentials are emailed to them automatically.

Workflow B — Add a teacher with subject assignments (Admin)

1. Open Admin → Teachers (Figure 6.6).
2. Select Add Teacher (Figure 6.7).
3. Enter the teacher's details and job profile; the Teacher ID is generated automatically.
4. Pick the branch and year, tick the subjects, and select Add Assignment — repeat for more classes.
5. Save. The teacher receives their login by email and is linked to all matching students.

Workflow C — Publish an announcement (Admin)

1. Open Admin → Announcements (Figure 6.14).
2. Select New Announcement (Figure 6.15).
3. Enter a title and message, choose General, Urgent, or Event.
4. Publish. It is instantly visible to students and teachers, and its view count tracks reach.

Workflow D — Run a live attendance session (Teacher + Student)

1. Teacher: open Smart Attendance (Figure 7.2) and select Mark Attendance.
2. Teacher: pick the date, lecture, and attendance window; start the session (Figure 7.3).
3. Student: open Attendance (Figure 8.2) — the live session appears; join and verify by fingerprint or face.
4. Teacher: watch verified students appear live; scan a profile QR for any student whose device fails.
5. Teacher: end the session — the record is saved and appears in the tracker and analytics (Figures 7.4, 7.5).

Workflow E — Schedule a lecture (Teacher)

1. Open Teacher → Timetable (Figure 7.6).
2. Select Add lecture (Figure 7.7).
3. Choose the subject, weekday, and free time slot — overlapping slots are blocked automatically.
4. Save. The lecture appears on every matching student's timetable and becomes available for attendance sessions.

Workflow F — Onboard an admission list (Admin)

1. Open Admin → Student Onboarding (Figure 6.12).
2. Upload the admission list (CSV, PDF, or image) and choose the strategy for already-enrolled students.
3. Select Parse File, review the rows, then Pre-check to validate.
4. Select Create Accounts — every student account is created and credentials are emailed automatically.

11. Notifications, Profile & Account

Notifications

The bell icon in the header is visible on every page and shows your unread count. Announcements, exam reminders, and activity relevant to you arrive here — urgent announcements are visually highlighted so they are never missed.

Profile & password

Every role has a Profile page (Figures 6.20, 7.15, 8.10) with personal details and a profile photo. Passwords can be changed from the profile area at any time, and the "Forgot password?" flow on the sign-in page recovers access with an emailed verification code.

Logging out

Use the Logout control in the header area (or the profile chip menu) on any page. You return to the sign-in screen immediately, and the next user of the device cannot see your data.

12. Troubleshooting

Situation	What to do
I can't sign in	Check you are on the correct role's sign-in page (Chapter 4). Verify your email/ID spelling. If needed, use "Forgot password?" to reset with an emailed code.
I didn't receive my credentials	Check your email's spam folder first, then ask your administrator to re-create or update your account — a fresh credential email is sent automatically.
The page opens slowly the first time	The very first visit of the day can take a few extra seconds while the service warms up. It is immediate afterwards.
No active attendance session is showing	Sessions appear only while your teacher is running one for your class. Use Refresh; if it still doesn't appear, confirm with your teacher that the session covers your branch, year, and subject.
My fingerprint isn't working for attendance	Switch to Face Recognition, or show your Profile QR Code to the teacher — they can mark you present by scanning it.
A page says I'm not authorised	You are signed in with a role that doesn't own that page. Sign out and sign in with the correct role.
A list looks out of date	Use the page's Refresh control, or reload the browser page.

13. Frequently Asked Questions

Q. Do we need to install anything?

A. No. CampusConnect runs entirely in the browser on desktops, laptops, and phones.

Q. How do new students and teachers get their passwords?

A. The platform generates credentials and emails them automatically when an account is created — individually or in bulk.

Q. Can attendance be faked by a friend?

A. No. Each verification uses the student's own registered fingerprint/biometric or face, is valid for one session only, and can additionally require the student to be physically nearby.

Q. What if a student's phone battery dies during attendance?

A. The teacher scans the student's Profile QR code (also available to the teacher from the student's record) and marks them present manually.

Q. Who can post announcements?

A. Administrators publish campus-wide announcements. Everyone can read them; urgent ones are highlighted.

Q. Can we bring in our existing student list?

A. Yes — Student Onboarding accepts your admission list as a CSV, PDF, or even a scanned image, validates it, and creates every account in one step.

Q. What happens at the start of a new academic year?

A. Academic Update promotes whole groups of students to their next year or semester in one bulk operation, with a preview first.

Q. Is every role's data separated?

A. Yes. Each role sees only its own workspace and actions; the platform enforces this on every page and every action.

14. Complete Feature Overview

Every module in the platform, and who uses it:

Module	Description	Used by
Dashboards	Role-specific overview with live counts and quick actions	All roles
Student Management	Add, edit, search, and organise students by department	Admin
Teacher Management	Add and manage faculty with subject assignments	Admin
Subject Sets	Official subjects per branch, year, and semester	Admin
Exam Timetable	Build by scan, manual entry, or PDF; auto reminders	Admin publishes; all view
Student Onboarding	Bulk account creation from an admission list	Admin
Academic Update	Bulk year/semester promotion	Admin
Smart Attendance	Live sessions with fingerprint, face, and QR backup	Teacher runs; Student marks
Attendance Tracker	Percentages, history, at-risk flags, reports	Teacher
Timetable	Shared weekly class schedule with overlap protection	Teacher adds; Student views
My Students	Per-subject student lists with CSV/PDF export	Teacher
Study Material	Upload and browse notes per subject	Teacher uploads; Student views
Announcements	Campus-wide notices with urgency and view tracking	Admin publishes; all read
Calendars	Events Calendar and official Academic Calendar	All roles
Messages	Real-time teacher–student chat	Teacher, Student
Discussions	Student discussion forum	Student
FixIt	Report and track campus issues	All roles
Profiles & Settings	Account details, photos, passwords, preferences	All roles
